PROFESSIONAL SUMMARY

Development supervisor and software developer experienced in enterprise solutions with Power Platform, .NET, React, and TypeScript. I manage product evolution from discovery and feasibility through prioritization, delegation, and delivery, while contributing directly to development when the solution requires it.

PROFESSIONAL EXPERIENCE

Circo Studio | Projects for YPF | March 2024 - Present

Development Supervisor and Power Platform Developer

- Manage and develop a corporate application used across business areas: gather needs with the client user and functional analyst, assess feasibility, estimate, prioritize, and distribute work.
- Document use cases, perform functional testing, and capture evidence with Azure DevOps Test & Feedback to validate releases and track issues.
- Configure Dataverse and Power Platform solutions: tables, columns, environment variables, Power Automate flows, test environments, and production releases.
- Manage roles and permissions across Dataverse, SharePoint, and corporate AD groups, aligning access with each user profile's responsibilities.
- Built and continue to evolve a reusable Power Apps UX framework with the design team. Led its adoption through training for the development team and YPF stakeholders; currently coordinate improvements, delegate enhancements, and support new team members.

SELECTED PROJECTS

WIRIN | Backend Developer | Academic team project | 2025 - Present

- Developed mainly the system backend: ASP.NET Core Web API on .NET 8, Entity Framework Core, JWT, SQL Server/PostgreSQL, and Azure OCR.
- The team presented WIRIN at the 23rd University Digital Library Conference and is validating it with library staff before implementation at UNLaM's library.

EDUCATION

Bachelor's Degree in Technology Management | Universidad Nacional de La Matanza | 2026 - 2027 | In progress

University Degree in Web Development | Universidad Nacional de La Matanza | 2022 - 2025 | GPA: 8.6/10

Electronics Technician | Instituto San José (A-355) | 2014 - 2019

TECHNICAL AND LEADERSHIP SKILLS

Power Platform: Power Apps, Power Automate, Dataverse, SharePoint, tables, environment variables, environments, production releases, roles, and permissions

Development: .NET 8, ASP.NET Core Web API, React, TypeScript, Angular, Node.js

Data, Azure, and delivery: Entity Framework Core, SQL Server, PostgreSQL, Azure, Azure DevOps, Git, Test & Feedback

Leadership and product: User discovery, feasibility analysis, estimation, prioritization, delegation, training, and functional validation

LANGUAGES AND TRAINING

Spanish: native | English: upper-intermediate with functional workplace communication | Portuguese: A2

Data Science course | Universidad Tecnológica Nacional (UTN) | November 2024
